HiveForYou

# Brand guide

How HiveForYou looks, sounds and behaves — so every screen, email and document feels like the same calm, exact place.

Version 1.0 October 2026 Owner: Founder

01

## Foundation

HiveForYou reads the paperwork people dread — an IEP, a Medicaid notice, a bankruptcy filing — and turns it into one clear picture where every point traces back to the page it came from.

### The complicated, made simple.

Slogan. Used after the logo or as a closing line — never rewritten, never with an exclamation mark.

| | |
|---|---|
| **What we are** | A home for complicated situations: upload whatever you have, and HiveForYou organises it, links evidence to every claim, and shows what's missing. |
| **Who it's for** | People facing a consequential conversation about paperwork they didn't write — parents, patients, debtors — and the professionals who help them. |
| **What we never do** | Invent facts, give verdicts, or take sides against the school, agency or court on the other side of the table. |
| **Why trust it** | No source, no claim. Every finding carries a source chip that opens the exact page. |
| **How it adapts** | One product, many domains. Each domain brings its own rulebook; the brand stays the same. |

**Personality**

**Calm**
We meet people at a stressful moment. We acknowledge it once, then get to work. Steady, never urgent.

**Exact**
Precise about documents, dates and numbers. Open about what the documents don't say.

**On your side**
We prepare the person, not the argument. Helpful without being adversarial.

02

## Name

The name is HiveForYou. "Hive" is the home where the case comes together; "For You" makes clear whose side it's on.

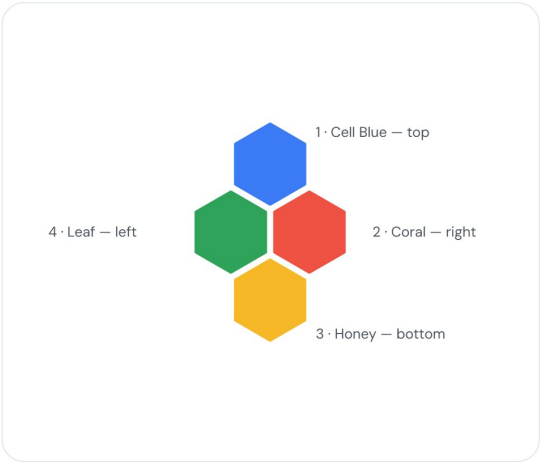

| | |
|---|---|
| **Written** | **HiveForYou** — one word, capital H, F and Y. In the wordmark, "Hive" is semibold and "ForYou" regular. |

| | |
|---|---|
| **Said** | “Hive for you.” |
| **Never** | Hive alone · Hive For You (spaced) in body text · Hive4You · HIVEFORYOU · hiveforyou (except in URLs, handles and code) · the HiveForYou |
| **Your hive** | The organised picture of one person’s case. “Building your hive”, “Open your hive”. Lowercase, possessive, never “the Hive”. |
| **Domains** | Named by what the person is dealing with: Special Education / IEP, Medicaid, Bankruptcy — never internal names like “packs”. |

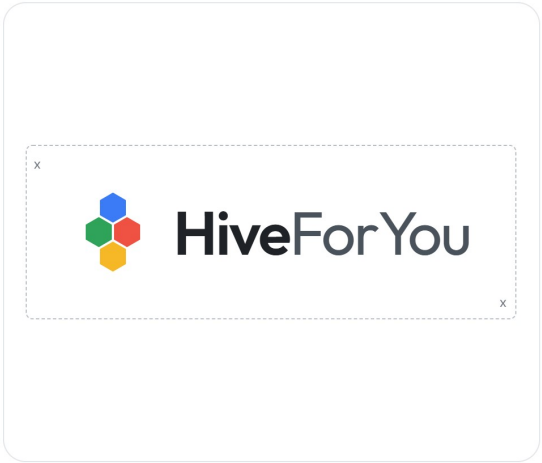

03

## Logo

The mark is four honeycomb cells settled into one shape — the complicated, made simple. It always appears in its finished state, except in motion.

Construction. Four regular hexagons, pointy side up, in a diamond. The colour order is fixed and goes clockwise from the top.

Clear space. Keep a margin of x on every side, where x is the height of one cell. Nothing enters it.

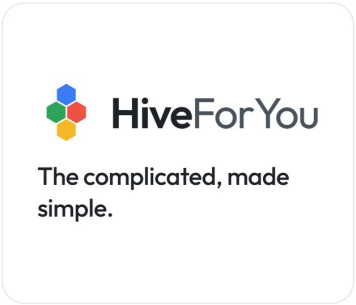

### Lockups

Horizontal — the default.

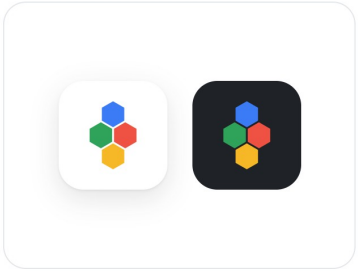

Stacked — square spaces only.

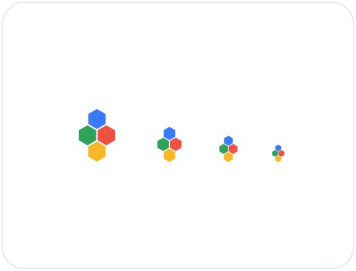

With slogan — website hero, slides, print.

On Ink. “ForYou” switches to light grey.

App icons. Mark only, on white or Ink.

Minimum: mark 16 px · horizontal lockup 120 px wide. Below 120 px, use the mark alone.

### Monochrome

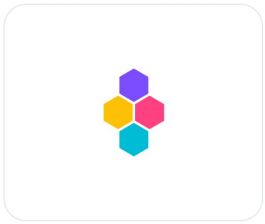

One colour, Ink — fax, engraving, black-and-white print.

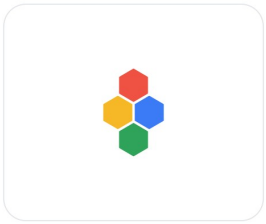

Reversed white — only where colour can't be reproduced on dark.

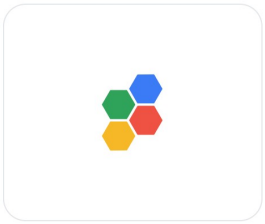

### Misuse

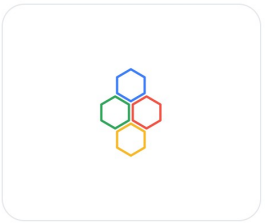

Don't recolour the cells.

Don't reorder the colours.

Don't rotate the mark.

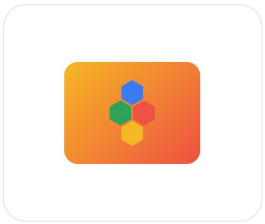

Don't outline the cells.

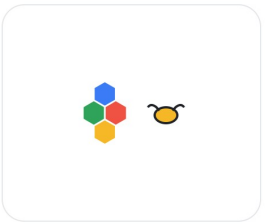

Don't shorten the name to "Hive".

Don't reset the wordmark in another typeface.

Don't place the colour mark on colour or photos.

Don't add a bee or any mascot.

04

## Motion

In motion, the logo tells the whole story: scattered, mixed shapes clear away while the four cells slide and turn into place.

| | |
|---|---|
| **Where** | App opening, the website hero, video intros, and the start of "Building your hive". |
| **How long** | About 1.2 seconds, played once. The finished mark then holds; it never loops inside the product. |
| **Order** | Clutter fades and shrinks first; cells arrive top, right, bottom, left — the same clockwise order as the colours. |
| **Easing** | Fast out, gentle settle (cubic-bezier .3, .9, .3, 1). No bounce, no spin past 360°. |
| **Reduced motion** | Show the finished mark immediately. Nothing else changes. |
| **Never** | Animate the mark on every page load, in emails, or behind text. |

05

## Colour

Four brand colours, each with one job in the product. Everything else is neutral, so colour always means something.

#3B7CF6

**Cell Blue**
Actions, links, focus. “Needs you.”
#1A56C4 text on white

#EF5143

**Coral**
Missing or blocked. Never decoration.
#B33A2E text on white

#F6B826

**Honey**
The brand’s warmth. “Changed.” Source chips.
#7A5200 text on white

#2FA35A

**Leaf**
Checked, complete, settled.
#197040 text on white

#1F2328

**Ink**
Text, wordmark, dark surfaces

#4A525C

**Graphite**
Secondary text

#6B737D

**Quiet**
Captions, metadata

#E3E6EA

**Line**
Borders and dividers

#F4F6F8

**Mist**
Panels, sidebars, wells

#FFFFFF

**Paper**
Page background

### Colour in the product

**Needs you**
Badge fill #E8F0FE · text #1A56C4

**Changed**
Badge fill #FEF3D6 · text #7A5200

**Missing**
Badge fill #FDEDEB · text #B33A2E

**Checked**
Badge fill #E6F4EA · text #197040

| | |
|---|---|
| **Proportion** | Paper and Mist carry about 80% of any screen, Ink about 10%, the four brand colours together under 10%. |
| **Text** | The four brand colours fail contrast as body text. For coloured text use the deep variants (all 5.5:1 or better on white). Honey is never used for text on white. |
| **Graphics** | Brand colours are fine for icons, charts and fills at 3:1 and above; Honey graphics need an Ink edge or label. |
| **The rule** | Colour never grades a person, a child or the other side. Coral means “something is missing from the record”, not “something is wrong with you”. |

06

## Typography

Two families do the work: Outfit for the brand’s voice, DM Sans for everything you read and click. Two supporting faces have narrow, fixed jobs.

**Outfit 500–600** — Wordmark, headlines, slogan

# The complicated, made simple.

**DM Sans 400–600** — Interface and body text

The new IEP lists reading instruction five times a week, 45 minutes each — the same as last year.

**Source Serif 4** — Words quoted from a document only

“Speech-Language Therapy | 60 min/week | Therapy room”

**JetBrains Mono** — Source chips and data references only

`New IEP · p.7`

| | |
|---|---|
| **Scale** | Display 48–64 · Title 30 · Section 21 · Body 16 · Small 14 · Caption 12.5. Line height 1.5–1.6 for body, 1.05–1.15 for display. |
| **Case** | Sentence case everywhere — headings, buttons, labels. No all-caps labels. |
| **Measure** | Body text under 70 characters a line. Anxious readers lose long lines. |
| **Numbers from documents** | Keep them exactly as the document has them, with units: “60 minutes a week”, never “60m/wk”. |

07

## Voice

HiveForYou sounds like a calm, exact friend who has read every page: it says what the documents say, names what they don’t, and turns every concern into a question you can ask.

| | |
|---|---|
| **Say what the document says, then stop** | Findings describe the record. They don’t guess motives, predict outcomes or assign blame. |
| **Name uncertainty out loud** | “These records don’t include…” is a feature. Silence where information is missing is the one unforgivable error. |
| **Questions, not verdicts** | Never “the school must” or “this is illegal”. Turn every legal impulse into a question the person can ask. |
| **Plain words** | About an 8th-grade reading level. Expand every abbreviation the first time, using the domain’s rulebook. |
| **Talk about people as people** | A child is a child, not a case or a profile. Use first names when we have them. |

### Say this, not that

| Say | Not |
|---|---|
| Worth asking | ~~The school violated~~ |
| These documents don’t show | ~~There is no evidence~~ |
| Upload whatever you have | ~~Organise your records first~~ |
| Usually about three minutes | ~~Instantly~~ |
| Your documents show | ~~Our AI determined~~ |
| Someone you trust | ~~Invite a collaborator~~ |
| What changed since the last plan | ~~Compliance gaps detected~~ |

### Tone by moment

| | |
|---|---|
| **Front page** | Direct, unhurried. “What are you working on?” |
| **Upload** | Casual about mess, clear about privacy. “Upload whatever you have — old, partial or out of order is fine.” |
| **Waiting** | Honest about time. “Reading your documents. This usually takes about three minutes.” |
| **A finding** | Specific and sourced. “The new IEP lists 60 minutes of speech therapy a week; the last one listed 90. Worth asking what changed.” |
| **Something missing** | Plain, not apologetic. “These records don’t include a progress report after October 2024.” |
| **An error** | What happened, then what to do. “This file is over 25 MB. Try splitting it into two.” |

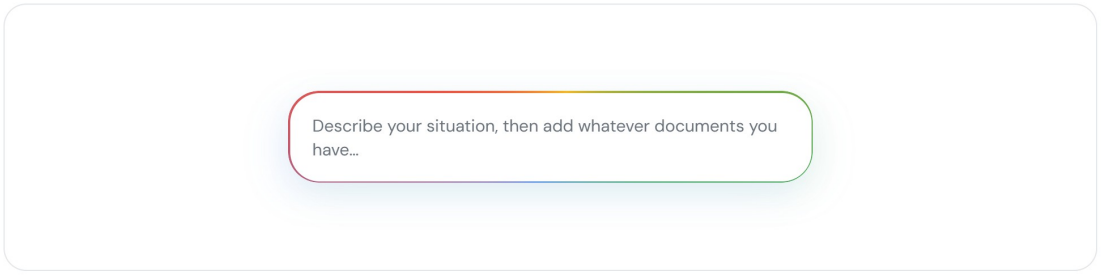

08

## Signature elements

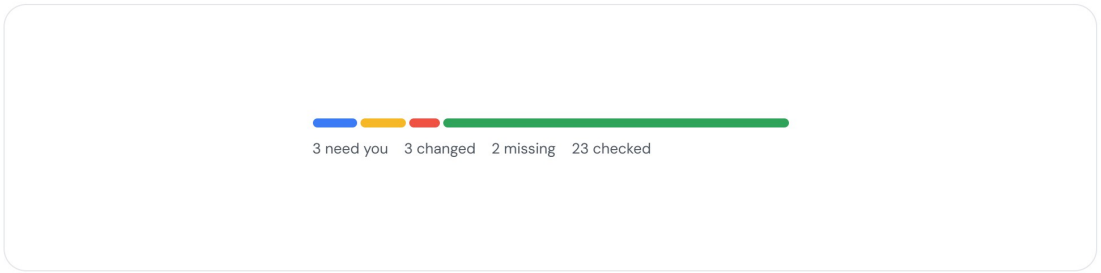

Three things make a screen recognisably HiveForYou even without the logo.

The source chip. Every claim carries one; it opens the page in place. Honey wash, mono type, document role and page — never a filename.

The four-colour ring. Appears around the main input on hover and focus — the brand colours meeting the person's own words.

The state bar. Need you, changed, missing, checked — always in this order, always these colours.

09

## Applications

How the system shows up where people meet it.

| | |
|---|---|
| **App header** | Mark + wordmark at 26–28 px mark height, left-aligned. No slogan inside the product. |
| **Front page** | Mark above "What are you working on?". The four-colour ring on the input. Nothing else competes. |
| **Favicon and app icon** | Mark only. Favicon on transparent; app icon on white (light) or Ink (dark), corner radius 22%. |
| **Email** | Small horizontal lockup at the top, plain text below, one action. No hero images. |
| **Shared briefs and exports** | "Prepared with HiveForYou" and the 16 px mark at the foot of each page. Quiet, never a watermark. |
| **Website hero** | The motion logo, then the slogan lockup. Real product screenshots from synthetic documents only. |
| **Social** | Mark-only avatar on white. Posts on Paper or Ink with one sentence in Outfit. |

10

## Guardrails

The brand is protected as much by what it refuses as by what it does.

| | |
|---|---|
| **No mascots** | No bees, honey drips or cartoon characters. The cells carry the idea. |
| **No stock people** | Never photos of children, crying parents, courtrooms or clinicians to sell the service. |
| **No AI theatre** | No sparkles, glowing orbs, robot icons or "✨ AI-powered". The quality of the findings is the proof. |
| **No invented proof** | No made-up quotes, counts ("trusted by thousands") or endorsements. |
| **No sides** | Never positioned against schools, agencies, courts or the people in them. |
| **No urgency we didn't find** | The real deadline in the documents is the only deadline we mention. |

**The test when something is borderline**

Would someone who saw exactly how this decision was made still trust us with their paperwork? If the answer needs explaining, it's a no.

11

## Tokens

Drop these into the product stylesheet. The names are the shared vocabulary between this guide and the code.

```
/* HiveForYou design tokens — v1.0 */
:root {
  /* Brand */
  --cell-blue: #3B7CF6;   --cell-blue-deep: #1A56C4;  /* text */
  --coral:     #EF5143;   --coral-deep:     #B33A2E;
  --honey:     #F6B826;   --honey-deep:     #7A5200;  --honey-wash: #FFF6DC;
  --leaf:      #2FA35A;   --leaf-deep:      #197040;

  /* Neutrals */
  --ink: #1F2328;  --graphite: #4A525C;  --quiet: #6B737D;
  --line: #E3E6EA; --mist: #F4F6F8;      --paper: #FFFFFF;

  /* States (badge fill / text) */
  --needs-bg:   #E8F0FE; --needs-fg:   var(--cell-blue-deep);
